Fuel Shortage at Isa

A big crash has closed the main road into Mount Isa, being held up is a few road trains containing diesel. Supplies are running very low and the trucks will not be there until tomorrow afternoon. One problem with that, night shift. And the big machinery up here needs the diesel to keep things running. After many hectic phone calls to find some, we have to get it up there as soon as possible.

Flight Plan and Aircraft

Turbo props for this flight and the bigger the better.

C-130's, Casa's, Spartan's etc

YBTR (Blackwater)
YAPH (Alpha)
YLRE (Longreach)
